## When did we work with the project

We worked with this sprint during the school lecture, and home during week 5.

## Sprint goal

Make wireframes for the web-site, get to know the project better, and find which tool we want to use for the wireframes.

## Work distribution

Did decisions like what tool to use, and got a common understanding of what the project was together, then we decided to individually design 1-2 pages each of the website, and try to make the website looking coherent.

## Accomplishment

We made a simple wireframe during the week and will use this as the baseline for what we expect to accomplish. We got to know the project well, and everyone was able to make their wireframe pages on time. We decided to use Figma as our tool for wireframes.
