When did you work with the project

We worked with this sprint during our weekly meeting, and home after school.

Sprint goal

Prepare for C1 checkpoint by completing and polishing the basic html, and complete exercises required for passing the checkpoint in the course. Further develop the wireframes to be more satisfied with the design.

Work distribution

The course exercises is individual and some off the group members did them by themselves and others met up to do them together. Pages in html and wireframes are distributed so that the one who designed the wireframe for the page, will make the html for that page. Therefore we will do the ground work from home on our individual page. Then meet and make sure everyone is satisfied, eventually help each other so we reach our goal.

Accomplishment

We passed the checkpoint, and finished the basic HTML, and now have wireframes which we are satisfied with.
