## When did you work with the project

We worked with this sprint during our weekly meeting, and home after school.

## Sprint goal

Start to develop the CSS for the webpage. Make a about us html page. Make resources folders and image folders, and continue to find images relevant to the webpage, which we can use to style.

## Work distribution

Each group member continues to work with the pages they've made basic HTML for and starts to style this page with CSS, to try to make it look like the wireframe. Finding images is something that everyone will do and we will decide together which images suits our webpage.

## Accomplishment

We've gotten a good start for the CSS, but there is still some work to be done. We have found a solid amount of pictures which can suit the webpage well. The folders planned is made.
