Sprint report week 11

Innhold

When did you work with the project

We worked with this sprint during our weekly meeting, and home after school.

Sprint goal

Continue working with CSS and try to finish it for the checkpoint. Decide on a final logo. Make entity classes for backend and database, and decide on the architecture for the application.

Work distribution

Individually continue to work with CSS for distributed webpage. Decide logo together. Work with backend and database together.

Accomplishment

The styling of the webpage is now good enough to present during the checkpoint. We have a logo which we are satisfied with. And have now gotten off to a good start with the database and backend.
